

Energy efficiency of robots

Project management:	Prof. Dr.-Ing. Holger Brüggemann
Summary:	The project will improve the energy efficiency of robots. For this purpose, robot site optimisation will be undertaken, and a guide to the energy-efficient programming of robots prepared.
Duration:	2015 – 2016
Contract amount:	€30,000
Organisational unit:	Faculty of Mechanical Engineering
Research areas:	Renewable Energies and Resource Efficiency, Intelligent Systems for Energy and Mobility
