

Joint venture: eCompetence & Utilities for Learners and Teachers (eCult)

Project management: Prof. Dr.-Ing. Nils Jensen, Dr. Uta Priss (acting)

Summary: Ostfalia's eCULT team (eCompetence & Utilities for Learners and Teachers) supports the use of eLearning technology at Ostfalia. It advises teaching staff on the use of online learning platforms (especially LON-CAPA and Stud.IP), amongst other things. Electronic exercises help to improve the learning success of students, by enabling individual and timely feedback for both students and teaching staff. We support teaching staff in creating tasks that are specific to the given lecture/seminar, and to the individual teaching style.

Funding: Federal Ministry of Education and Research

Duration: 2016 – 2020

Funding amount: 464.164 €

Organisational unit: Faculty of Computer Science
